CARE & USE

12PC COOKWARE SET

12PC COOKWARE SET

**Induction
Base**

Dear Consumer,
Congratulations on your decision to purchase my amazing high quality, easy to use and clean, natural titanium infused ceramic coated cookware. With proper care, your new cookware should give you many years of use. Please take a moment to read the use and care instructions that follow. Should you have any questions please feel free to contact our consumer care department at ToddEnglish@hhgllc.com

When you take it out of the package:

- Wash in warm soapy water with a soft cloth
- Dispose of packing materials in an environmentally friendly way

When it's time to cook:

- Do not preheat on high setting. This pan and coating heats up very quickly and needs less heat than older style pans. It is best not to keep the heat higher than necessary for long periods of time. You will find that the aluminum base provides very quick and even heat conduction for easy cooking.
- Do not allow pan to boil dry; not only is that dangerous for your home but also bad for your cookware.
- (For induction ready cookware only) When using the induction cooktop, please select the induction element with a diameter that matches the diameter of the bottom of pan.
- Add cooking oil for better cooking result.

- This cookware set is oven safe up to 450°F degree without lid; 400°F degree with lid.

When it's time to bake

- The carbon steel base provides very quick heat conduction for more efficient baking. You can preheat and bake as you are used to or as the recipe you are using calls for but take care not to leave the bakeware in the high heat with no food material on it for very long after using. This will keep the surface cleaner and brighter for a longer period.
- For many recipes you can reduce the amount of grease or butter used to grease the pan or even eliminate it. Some recipes you can just pour your batter and when finished take your finished baked item off the sheet, all with no extra grease or butter on the pan. Test out your recipes to see if you need less or no lubricants for the surface of the sheet.
- Silicone handle can be heat-resistant up to 450°F. Make sure your bakeware set is clean and dry before storing away.

When it's time to clean:

- One of the benefits of ceramic coating is that it is non-stick, so most food particles and cooking oils will wipe off easily with a clean dry cloth. Make sure that your pan is clean and dry after use. Food particles that remain on your pan tend to become harder to remove after continued use.
- After cooking or , please allow the pan to cool slightly before immersing in water. Do not wash the pan right after cooking, as it may affect non-stick performance.
- If your cookware has a polished or metallic exterior, we recommend to clean it with soft cloth or sponge to prevent scratches.
- This cookware and bakeware set is dishwasher safe; however, hand washing is always recommended. If you do choose to put your cookware in the dishwasher, please choose alkaline-based detergents to dissolve grease, oil, and fats.
- You also can remove the silicone handle for bakeware cleaning.

How to care for your new cookware:

- Do not use any abrasive substances such as chemical or mineral cleaners
- Do not use harsh or rough material to clean
- Do not use scouring pads or steel wool unless they are specifically made for ceramic-coated pans.
- Make sure pan is clean and dry before storing away.

With proper use and care, your new cookware set should give you many great cooking experiences.

Sincerely,
